Welcome

to our American Science & Surplus catalog. Here you will find a unique mix of industrial, military and educational items, with an emphasis on science and education. We supply a wide range of unusual and hard-to-find items (some say bizarre stuff) to the hobbyist, tinkerer, artist, experimenter, home educator, do-it-yourselfer, and bargain hunter. Our items are great gifts, inexpensive supplies, and an endless reason for a giggle or a "Gee whiz!" We try to be scrupulously honest in presenting whatever we know about what we have, and always take it back, no questions asked, if the customer isn't satisfied with it. Please remember that we offer many more items than will fit on these pages. You can both peruse and purchase every item we have at our website: www.sciplus.com. Thank you for taking the time to browse our catalog. We appreciate your business.

Frequently Asked Questions

What is surplus?

We buy closeouts, inventory overruns, mis-manufactures, and items whose time has not come. We can usually acquire these items on a one-time-only basis. When a surplus item is gone, it is gone. So if you see something you love, best get it now since we may not have it tomorrow. Our website is frequently updated with our inventory. If you see an item in our catalog, but cannot find it online, it means we have sold out of that item. If our stock of the item you have ordered is exhausted we will refund that portion of your remittance. When we can't find surplus, we may carry regular merchandise which we think those interested in learning and tinkering will find appealing, but only if we feel it is good quality at a fair price.

Can I return items?

Yes. We accept all returns without question and will either refund your purchase price or send you a replacement, as you chose. Returns must be made within 30 days of purchase. For complete details, please check the order form bound in the center of this catalog.

What forms of payment do you accept?

We accept Visa, MasterCard, Discover, American Express, checks and money orders. We are sorry to report that we cannot accept CODs, cash, stamps or gold. **If paying by check, please be aware that you are authorizing American Science & Surplus to use the information on your check to make a one-time electronic debit to your checking account. This electronic debit will be for the amount indicated on your check. If you do not have sufficient funds in your account, a returned check fee may be debited from your account. If you have any questions, or choose not to have your check converted into an electronic item, please contact American Science & Surplus at (888) 724-7587.**

Do you have a minimum order requirement?

We regret that the costs of doing business preclude us from processing orders of less than \$10.00 merchandise value (exclusive of shipping and handling). We will return orders of less than \$10.00 merchandise value.

Additional information can be found on the order form bound in the middle of this catalog.

Holy Handles, Screwman!

We're loving this (7)-piece, oversized-handle, cushion-grip screwdriver set from Morris. Don't Call It Crazy...

Ahh, what the heck, go crazy and call it whatever you want. It's a (3)-pack of all-purpose contact cement glue in large tubes that hold just under (1) oz each. That's a lot of very powerful glue. You could repair shoes, furniture, toys and appliances made of wood, rubber, metal, glass, leather, plastic or cork and still have some left over. Floor Tape

As handy and amazing as this stuff is, it's not really for fixing torn floors. This 2-1/2" wide Non-Slip Rug Grip Tape is to hold your rug to the floor—so it doesn't buckle or slide when someone walks on it. Has a sort of fiber/mesh design and it's tackier than a Reno wedding chapel gift shop. The manufacturer suggests changing the tape every 30 days, but your mileage may vary based on how many sprinting pets and stampeding children you have. You'll get a 23-foot roll, which you can use on anything that needs stickiness on both sides.

For Clear Boundaries, GITD Tape

There were three concussions during the last midnight staff volleyball game because no one could see the lines on the court. A little light will let you see the center line for your next power surge. Made in the USA.

On & Off Like A Valve

It's funny how some things are named so appropriately—like this PVC turn valve for water (and other fluids) shut-offs and turn-ons (including walks on the beach). Whole thing measures 4" end-to-end with a big, thick T-handle to twist with your thumb and forefinger. Great for DIY plumbing, which is always the best because you do things right.

Peltier Heat Pump

High tech comes to Am Sci & Surp!! It is here in the form of a Peltier junction, a thermo-electric device that translates electric power into heat, and perversely, into cool. Apply current at 15VDC to the gizmos and they extract thermal energy from one face, thereby cooling it. The heat is dumped onto the other face, thereby heating it. Please note: you must use a heat sink on the hot side or the junction will fry itself, since it can quickly create a 65° C temperature differential in a no load situation. Or run it backwards. Apply heat or cold to the relevant face and produce a current. They come with a datasheet. 1-9/16" sq. x 3/16" thick and draws 6A.

Not The Drinking Kind

Decidedly clever little gizmo reminiscent of our ever popular tornado tube. It consists of a plastic sleeve into which one screws two empty 2-liter soda bottles. Inserted into the connecting tube are clear plastic "straws", one extending toward the bottom of each bottle. Fill one bottle 3/4" full of water, colored if you like, invert the duo, and watch water spew from the top end of the top "straw". It is all because of the vacuum created as the water drains from one bottle to the other and is a great physics demo item. It looks as though the water defies gravity. Instructions/description are on the package.

Does anyone need to be told what a Slinky® toy is? Okay, it is a very slack spring, 2-7/8" dia x 2-1/2" long, compressed. It will stretch out to about 5 or 6 feet long without deforming. That's the boring part. The interesting part is that it "follows" itself. Slish it from hand to hand. Put in on the top step of stairs, flip the end down a step, and watch it walk down stairs, or down an incline (they can do it alone, but we recommend them in pairs). Believe us, no childhood (or adulthood) is complete without an original steel Slinky®.

Victorian Dropper

It looks as though it should be used for administering laudanum! A 1-1/4" sq x 3" tall clear glass bottle, it has thick molded sides and a heavy lip: very antique in appearance. It is stoppered with a red(!) rubber stopper which is the squeeze bulb for the glass dropper tube inside. A real eye catcher, but give it a good wash please. It clearly is not sterile.

This very convincingly antique-looking brass-topped glass mister looks sort of like an oil can, except it's made of ridged glass. Has a finger hold and a thumb pump—old school and sophisticated. For Little Birdies...Or Bogeys...

Surplus! These (former) promo items are 5" tall golf bags, mostly clear with primary color accents. Best of all? No logos! Golfers use them to store (3) balls. There's also an outside pocket for pencils, tees and ball makers, and that pocket is zippered just like the main compartment is. Each bag has a plastic snap clip so you can hang it from something—like an actual golf bag. But you don't have to use it for golf. It appears that only blue bags remain, but much like the fairway: conditions change without warning, so you might get another color instead.

Is That Length Flexible?

Remember those slap bracelets that swept the nation a few years back? This 18" long x 3/4" wide easy-to-read ruler is sort of like those in that it stays bent and then snaps open again, but nothing like those in that this is not a fashion accessory. Or is it? Until you decide on that, consider that, tool-wise, it has magnets on the end to keep itself shut, but also to attach it to anything metal. Has standard 1/16" markings with clear lines and large digits.

Our old buddy Rod was quite the magnet—mostly for trouble and Johnny Law—so we can't help feeling nostalgic as we grip this 4" x 3/8" alnico rod magnet. Mystery Magnet

Beats us, frankly, but this black plastic cover, 1-3/4" x 1-1/2" x 1/4" (not unlike a tiny toilet seat cover) is hiding a really nice 1" dia x 1/8" (think: quarter size) plated neodymium magnet, with at least a 5-lb pull, inside. The mystery is that the cover won't open unless you break it. The magnet grabs fine in the case or out of it (and frankly, it makes it easier to take off a surface). Or, tap it on its side with a hammer to crack open the case and reveal nothing but magnet. Just Watch your fingers, please.

Killer Magnet

Once upon a time, a copywriter put this little magnet next to his computer monitor and got really pretty, wavy, aurora-like effects. And then got a new monitor! Don't try this at home. Our shiny, silver-colored 1" x 1" x 3/8" neodymium magnet looks innocent, but is industrial strength, pulling something like 25 lbs with enough strength left over to erase all your credit cards. Mood Sheet

See psychedelic patterns the safe way! Press your hand on this 6" x 6" sheet of liquid crystal and leave a print of swirling colors that, like the mood ring of yore, you can use as a sign of your mood. The pattern will blend and fade in seconds as the crystals react to temperature. Tiny liquid crystals inside the film-like material react to heat by changing colors. As science, it demonstrates the way liquid crystal displays work. And you can cut it into pieces to incorporate into a science project.

For Walls, Not Skies

Don't use these super-cool FAA aeronautical charts to navigate the skies, because they're expired. Not long ago they were used for training and flight simulators. We have an assortment of random U.S. charts, and we'll send you a great one. They measure approx 58" x 20" but will vary depending on the area of the country they depict. Is The Library Safe?

This isn't a book, but it's definitely book-ish. Looks like a leather-bound volume from the Bodleian but it's just a little wooden box, approx 8-1/2" x 5" x 2" (7" x 3-7/8" x 1-5/8" inside) that's perfect for stashing the jewels, cash, or whatever you need to stash in plain sight on the shelves.

Dam Fine Music Box!

We really ought to stop being surprised at this point, but then stuff like this comes along and loudly announces, "No, you haven't see it all!" Behold, the beaver rotating birch tree ballet music box, which is chocolate kiss-shaped, measures 6" x 6" x 7" and has a multitude of busy beavers climbing all over it. Great detail, full of sticks and rocks and greenery, and just as beautiful when it's sitting still. Plays the tune "Edelweiss." As clever as we think we are, we couldn't make this stuff up. From the Lou Rankin Collection™.

The Directional Dish

This nautical-ish, New England-ish, dish-ish tray resembles a pocket watch, approx 4" dia, but hollowed out (remember, it's a tray?), with black compass symbols on a white background. Has a shiny golden front edge, back and hanging hook on top. Might be brass. Call it a trinket tray that measures approx 3/4" deep. Don't use it for food, but put anything else you like in it. Or hang it on a wall for a touch of old-world charm and mystique. Ahoy, Surpies.

A Storm's A Comin'

Admiral Fitzroy used a device like this to determine weather changes aboard the HMS Beagle on Charles Darwin's expedition. This, of course, is why it's known as Fitzroy's Storm Glass. It's believed that the different crystal formations inside the approx 11" tall x 1-1/2" dia glass tube with a 2-1/4" base indicate weather changes. Must be placed on an interior wall not subject to sudden temperature changes, sunlight or air from vents and may need to be tested in multiple locations. Follow the instructions carefully and give it about a week to stabilize. It goes without saying, but this is not a toy. It has flammable liquid inside, so no rough-housing near the Storm Glass!

Soil Test Kits

The budding home scientist and horticulturist will both delight in the ease with which this self-contained soil test kit brings discovery. The kit measures not only pH, but also Nitrogen, Phosphate and Potash content and contains material for 40 tests. Since these are the essential ingredients affecting plant nutrition, we see a science project in the making: experimental plant growth in soils with different amounts of acidity and/or nutrients. From Luster Leaf(tm), the kit is entirely self-contained and includes complete instructions for use and explanations. Be careful, please, the kit does have chemicals and should not be used by young children without supervision.

Suit Your Soil

Grow a beautiful garden full of plants that love your soil! It's easy if you know your soil's pH, and we have a gauge to help you! Stick the probe into moist soil for the pH to register in a separate 4" x 2" x 1" gauge box on the end of a 26 inch cord. That lets you read the gauge without having to lay on the bug and worm covered ground to see it! A needle indicates the pH on a scale of 3.5-9, and you get a list of which plants like which pH levels.

Classic-ish Lantern

We got this all-metal, 6-1/2" tall x 4" dia solar-powered decorative lantern from i-Zoom®, one of our most trusted light suppliers.
